

UNIT 3: PROFESSION OF THE VIETNAM COAST GUARD

I. INTRODUCTION

The lecture introduces the working measures of the Vietnam Coast Guard, which is how the force is organized to perform its functions, missions and authority. The reality of the need to increase the use of the Coast Guard in the management and protection of sea areas as well as the internal requirements for the force's construction and development have set an urgent requirement to develop and apply working measures. in organizing the performance of functions and duties of the Coast Guard.

II. TEXT

Working measures of the Coast Guard are determined and applied based on political tasks; The functions, tasks and authority are prescribed by law and require the management and protection of sea areas of the Coast Guard.

After nearly 25 years of operation, the practice has proved that the measures of the Coast Guard have their characteristics and are effectively implemented by the Vietnam Coast Guard in protecting sovereignty, and maintaining security and order. , safe at sea.

However, before the Law on Coast Guard of Vietnam, measures for the work of the Coast Guard in particular, theoretical issues about the Coast Guard, in general,

have not been properly researched and developed; not yet recognized by law, regulated or regulated incompletely.

To institutionalize the working measures of the Coast Guard to protect national security, and ensure order and safety at sea by the law, the Vietnam Coast Guard Law 2018 specifically stipulates 7 working measures of the Coast Guard in Article 12, Section I, Chapter III, which are: (1) Mass mobilization, (2) Law, (3) Diplomacy, (4) Economic, (5)) Scientific-technical, (6) Professional, (7) Armed measure to defend national security and to secure order and safety at sea as regulated in this law.

Currently, according to the provisions of current law, related to the use of the above working measures, the 2004 National Security Law stipulates a specialized force to protect national security (including the National Security Police). Vietnam's coast guard) may use the above 07 measures to protect national security. The Government has issued 02 Decrees on mass mobilization and legal measures.

To ensure an effective fight against all types of crimes and violations of the law in the field of order and safety at sea, it is necessary to advise competent authorities to issue legal documents on the issue of maritime security. professional measures. However, human rights and citizens' rights may be restricted only under the provisions of the law in case of necessity for reasons of national defence, national security, social order and safety, social morality, etc. community health (according to Clause 2, Article 14 of the 2013 Constitution). Meanwhile, if it is necessary to publicize the provisions on professional measures of the Law, it will likely reveal professional secrets, affecting the effectiveness of the fight against crime and law violations.

The specific and clear regulation of Coast Guard working measures in the Vietnam Coast Guard Law is a new point compared to the Ordinance on the Vietnam Coast Guard. This new point not only contributes to overcoming the shortcomings of the previous legal system but also serves as a solid legal basis for the Vietnam Coast Guard to carry out its assigned functions, tasks and powers. ; properly demonstrate its position and role as the people's armed forces, the State's specialized force, as the core of law enforcement at sea.
